## PROFILE

Senior WordPress / Full-Stack Web Developer with 8+ years of commercial experience across WordPress, JavaScript, PHP, and modern frontend development. Owns projects end-to-end — from Figma handoff to production launch — building custom WordPress themes and plugins, Gutenberg/ACF-based systems, WooCommerce stores, and multilingual (including RTL), SEO-driven websites for international clients in fintech, SaaS, e-commerce, and education. Equally comfortable in modern JavaScript stacks (React, Next.js, TypeScript, Node.js, GraphQL, Hasura) and headless/no-code platforms (Storyblok, Webflow). Combines hands-on development with technical SEO, performance optimization, analytics and conversion tracking (GTM, Google Ads), CI/CD with GitHub Actions, hosting and Cloudflare configuration, legacy-code refactoring, and cross-functional collaboration with product, design, and SEO teams.

## CORE EXPERTISE

| | |
|---|---|
| **WordPress & CMS** | WordPress, Gutenberg, ACF, custom post types, WooCommerce, WPML (incl. RTL), Storyblok, Webflow, Elementor, Divi, Avada |
| **Frontend** | JavaScript ES6+, TypeScript, React, Next.js, jQuery, HTML5, CSS3, Sass/SCSS, LESS, BEM, Tailwind CSS, Bootstrap |
| **Backend & Data** | PHP, Node.js, Express.js, MySQL, PostgreSQL, MongoDB, Hasura, GraphQL, REST APIs |
| **SEO, Analytics & Performance** | Technical SEO, SEO audits, Core Web Vitals, performance optimization, structured data/schema, sitemaps, robots.txt, canonical URLs, redirects, multilingual SEO, Google Tag Manager, Google Ads conversion & form tracking |
| **DevOps & Hosting** | Git, GitHub Actions (CI/CD), Docker, Cloudflare (CDN, caching, DNS, SSL), GoDaddy and other shared/managed hosting |
| **Workflow & Leadership** | Figma-to-code, Postman, npm, Webpack, Gulp, unit & e2e testing, code review, team leadership, mentoring |

## PROFESSIONAL EXPERIENCE

### Freelance — Full-Stack WordPress / Web Developer

*Oct 2023 – Present*

- Own end-to-end delivery of custom WordPress themes, plugins, Gutenberg blocks, and ACF-based content systems for international clients, from technical scoping through launch and post-launch support.
- Built a bilingual English/Arabic (RTL) learning platform for a regulated trading broker: custom theme, courses with progress tracking and certificates, multiple custom content types, and live-webinar scheduling.
- Build and maintain multilingual, corporate, fintech, e-commerce, and content-heavy websites, integrating third-party APIs and services.
- Work across modern CMS and frontend stacks — WordPress, Storyblok, Next.js, React, TypeScript, Webflow, PHP — selecting the right stack for each client's scale and budget.
- Translate Figma designs into responsive, reusable components in direct collaboration with clients on product and design decisions.
- Drive technical SEO and performance work: schema markup, sitemaps, robots.txt, canonical/redirect logic, multilingual SEO, and Core Web Vitals improvements.
- Configure Google Tag Manager, Google Ads tags, and form conversion tracking to give clients reliable marketing analytics.
- Set up GitHub Actions workflows to automate builds and deployments; deploy and maintain sites on GoDaddy and other hosts, configuring Cloudflare for caching, DNS, and SSL.
- Refactor legacy codebases, resolve production issues, and automate repetitive workflows to speed up delivery.

### Computools — Full-Stack Developer

*Jun 2017 – Oct 2023*

- Built custom WordPress themes and plugins for marketplaces, corporate websites, and an interactive educational platform.
- Delivered frontend and full-stack features with React, Next.js, TypeScript, Node.js, GraphQL, Hasura, React Admin, Sass, and MySQL across multiple concurrent products.
- Owned database and Node.js work on a 3D-model quality evaluation platform within a 20+ person team, shipping new functionality and refactoring legacy code without disrupting production.
- Wrote unit and end-to-end tests, participated in code reviews, integrated third-party APIs, and built reusable UI/CMS components adopted across projects.
- Delivered projects spanning booking/calendar systems, crypto products, and educational and corporate platforms.

### AVEDsoft — WordPress Developer

*Nov 2016 – Jun 2017*

- Led a team of three WordPress developers: planned task allocation, reviewed code, and mentored the team in Git, JavaScript, jQuery, and Bootstrap best practices.
- Acted as the technical point of contact across online stores, sports portals, international corporate websites, restaurant websites, and booking systems — from technical decisions through final QA.
- Worked hands-on with WordPress, PHP, MySQL, JavaScript, jQuery, CSS, Bootstrap, and Git while owning delivery timelines for the team.

### UDTech — Junior Web Developer

*Aug 2015 – Aug 2016*

- Contributed to a large international airsoft resource and developed corporate, sports, and product-promotion websites.
- Built foundational full-stack skills with Yii2, PHP, WordPress, MySQL, JavaScript, jQuery, HTML/CSS, Bootstrap, Git, and MVC architecture.

## SELECTED PROJECTS

### Trading Education Platform & Broker Website*

*2025–2026*

Built a custom WordPress theme for a regulated broker's trading academy: bilingual English/Arabic (RTL) with WPML, structured courses with progress tracking and certificates, custom post types for articles, video clips, tutorials, glossary and live webinars (with time-zone-aware scheduling), user registration, lead-capture forms, and GTM tracking. Also supported the broker's main marketing website.

***Technologies:*** *WordPress, PHP, WPML, ACF, Gutenberg, JavaScript, Sass, GTM*

### Multilingual VPN Product Websites*

*2024–2025*

Maintained and optimized four multilingual product websites as part of a product team working closely with SEO. Developed WPML/Gutenberg/ACF solutions, implemented workflow automation, improved performance and search visibility, and refactored legacy code.

***Technologies:*** *WordPress, PHP, WPML, Gutenberg, ACF, JavaScript, Sass, Technical SEO*

### 3D Model Quality Platform*

*2023*

Platform for evaluating 3D models and printability with different materials and printers. Implemented new functionality, worked with the database and Node.js, and supported and refactored legacy code within a 20+ person team.

***Technologies:*** *React, TypeScript, Node.js, MySQL*

### Watch Certification Platform*

*2023*

WordPress platform for verification of expensive watches with ownership and servicing history. Established project structure, built responsive pages and reusable Gutenberg components, and integrated third-party services.

***Technologies:*** *WordPress, Gutenberg, PHP, JavaScript, Sass*

### Educational Platform*

*2021–2022*

School platform where teachers create lessons by topic and difficulty and students complete tests. Built responsive pages from Figma, integrated WordPress as a CMS, created custom WordPress APIs and reusable Gutenberg components, and connected the API to a React frontend.

***Technologies:*** *WordPress, React, Gutenberg, REST API, JavaScript, Sass, Figma*

### Booking / Calendar Service*

*2021*

Time-management and booking application with calendar-style time slots. Helped establish coding standards and best practices in a startup environment and worked on cross-browser frontend development.

***Technologies:*** *React Admin, Hasura, FullCalendar, TypeScript, GraphQL, Tailwind CSS*

### Photo Stock Platform*

*2019–2020*

Photo-stock product with image optimization and user management. Built responsive pages from Figma, developed new features, optimized performance and SEO, and integrated Stripe.

***Technologies:*** *WordPress, JavaScript, Sass, Figma, Stripe, SEO*

## EDUCATION & LANGUAGES

### Zaporizhzhia National University

*2012 – 2016*

Bachelor's degree — Mass Communications, Public Relations & Advertising

### Kharkiv Polytechnic Institute

*2011 – 2012*

Specialized Computer Networks studies
